<b>Fished</b>	<b>11</b>	<b>322.12</b>		<b>Average of over 29lb per angler.</b>

With the venue five hour record at 68lb this result with three 50lb+ weights suggests that the record could go this year. Most of the bigger fish were spawning so weights were typically made up of our turbo-carp; ferocious fighters than punch way over their 1-3lb weight bracket.

Dan on 22 had 21lb of mostly bream (and a 2lb chub) in close with his 35lb of method feeder caught carp. Unusual to get a good bream at this end, perhaps there for spawning?

Five months back just getting a bite from anything was a challenge. Now in the warm weather the small roach and rudd are ravenous and will hammer soft baits in many pegs. All good for the future as they say.

Next week back to Frogmore.
