We decided today to have an additional silvers pool as the carp started to slow down. A noticeable dip in temps saw the colour starting to drop out from the water at Riverside. There was a noticeable lack of bream and only a few carp showed. Allan and Stan in the bay between peg 30 and 14 had a fair few crucians and brown goldfish between them. Stan adding a couple of small carp and Allan had a lone bream, a tench, a fair few roach and some perch to about 1 1/4lb in his all silvers net.

Roger Brown on 16 didn't have many carp but there were good sized fish and Alan Thoams had a few carp as well but importantly added some silvers to his carp.

Overall it fished harder and you definitely had to fine down for bites reminding us winter is definitely on its way.
